

ACURA/HONDA ODMD BROWN NAVIGATION SYSTEM:

Important screens for troubleshooting:

1) SYSTEM/DEVICE INFORMATION SCREEN (get a current screen - not the one retrieved prior to installation)

- Turn on ignition and allow navigation system to complete start-up sequence
- Press the SETTINGS button
- Select SYSTEM SETTINGS
- Select OTHER
- Select SYSTEM/DEVICE INFORMATION on the navigation screen
- Take a picture of this screen

2) DIAGNOSTIC VERSION SCREEN (depending on model year of system – buttons are different – see 2 options below)*

A) For Model Years 2017 and newer:

- Press the following buttons all at the same time for about 5 seconds:
<Info> <Settings> and <Back>
- Select: 'Detailed Information & Settings'
- Select: 'Version Information' Press OK
- Take a picture of this screen

B) For Model Years 2016 and older*:

- Press the following buttons all at the same time for about 5 seconds:
<Navi> <Menu> and <Back>
- Select: 'Detailed Information & Settings'
- Select: 'Version Information' Press OK
- Take a picture of this screen

*If system has no MENU button – then follow Option A.

*If you can't get the option to work that matches your model year – try the other option
